

Company Presentation

ChemValve-Schmid AG manufactures high quality valves which are sold and distributed through a carefully developed network of long standing partners in more than 40 countries all over the world.

Our company has grown and developed in an area with a long standing history of mechanical fabrication where high precision manufacturing is a matter of course.

Our highly motivated work force of specialists have over ten years experience of precision valve manufacturing. This when combined with our state of the art manufacturing equipment ensures that we are able to fulfil every order on time whilst maintaining and delivering our high levels of quality throughout.

Product Overview

The products of ChemValve-Schmid AG can be divided into the following lines:

- PTFE/TFM lined Butterfly Valves
- Non-Return Valves, Check Valves and Double Disc Check Valves
- Special Valves

Furthermore ChemValve-Schmid AG specialises in the manufacturing of custom built products made out of special materials like Hastelloy (Nickel Alloys), Titanium and PTFE.
